**Disruptive Voices** is a community of people who desire, demand, and aim to speak for change and empowerment. Our aspiration is to build a strong community of support for one another.

**While consent would seem to be a straight forward term, for far too many years the lines of consent have been blurred and trivialized. From sexual assault to dating to compliments to "hitting on"...consent is an issue which requires discussing.**

**We're here to work together to understand and deconstruct what consent actually is. This workshop is intended to help define those lines. It is imperative to understand when and where we need to step in and consider what we must do to ensure that consent is always present in the performance of our own sexualities.**

**You are cordially invited to join us at this event to discuss consent in all of its forms with one another. A guest lecturer will be attending this event and will be taking part in this discussion.**

**Together we can clarify the blurred lines and greater understand just what is and what isn't when it comes to consent.**
